

# How to Set Up Your IMAP Email Address in Outlook for iOS *Outlook for iOS (Build: 5.2607.0)*

## Setup Outlook for iOS for the first time

1. Download the “Microsoft Outlook” app from the App Store.

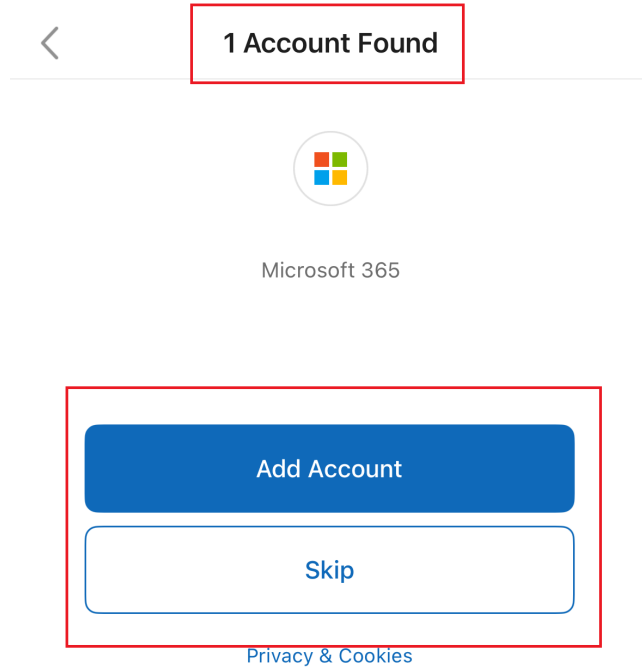

2. Open the app.
3. Tap “Add Account”

#### 4. If Outlook Finds an Existing Account

- If your account is detected, you will see it listed.
  - Tap “Add Account” to add this email account.
  - Or tap “Skip” to continue to add a different new account.

#### 5. If No Account is Found

- If no account is detected, tapping “Add Account” will take you to the account setup page.
6. Enter your email address (e.g., [john.doe@dreamersi.net](mailto:john.doe@dreamersi.net))
  7. Tap “Add Account”

## Add Account

Enter your work or personal email

john.doe@dreamersi.net

Add Account

Create New Account

Sign in using the QR code on your computer

### 8. Select "IMAP" for the email provider

## Add Mail Account

Select your email provider:

### MICROSOFT

Microsoft 365

Outlook.com

Exchange

### OTHER

Yahoo! Mail

iCloud

Google

### ADVANCED

IMAP

10. Enter the following information.

Email Address

john.doe@dreamersi.net

Display Name

John Doe

Description

Work

- **Email Address:** Your email address (e.g., john.doe@dreamersi.net)
- **Display Name:** Your Name (e.g., John Doe)
- **Description:** Display name for this account (e.g., Work)

The screenshot shows the configuration for two mail servers. The top section is for the IMAP Incoming Mail Server, and the bottom section is for the SMTP Outgoing Mail Server. Both sections include fields for Hostname, Port, Port Security, Username, and Password. The IMAP section has a red arrow pointing to its title, and the SMTP section has a red arrow pointing to its title. At the bottom, there is a toggle switch for 'Use Advanced Settings' which is currently turned on.
